Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, clay). Neutralize spill with lime or soda ash. Must be disposed of in accordance with local and national regulations.

AF 25NH (AFCO 8695)

Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

Methods and Material for Containment and Cleaning Up

For Small Spillage: Small Spills: If directed to an industrial sewer, wash down with large volumes of water. Spills can be neutralized and absorbed with soda ash or lime, but neutralization will release carbon dioxide, which can generate a breathing hazard. Dike far ahead of liquid spill for later disposal.

For Large Spillage: Prevent entry into sewers or waterways. Contain large spills and pump into a suitable tank for disposal. Spills can be neutralized with a lime or soda ash. Flush area with large amounts of water. Adequate ventilation is required due to release of Carbon Dioxide. Place in container for proper disposal. Must be disposed of in accordance with local and national regulations.

Reference to Other Sections

See heading 8, Exposure Controls and Personal Protection.

SECTION 7: HANDLING AND STORAGE

Precautions for Safe Handling

Additional Hazards When Processed: When heated to decomposition, emits toxic/irritating fumes.

Hygiene Measures: Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eating, drinking, or smoking and again when leaving work. Do not eat, drink or smoke when using this product. Wash hands and forearms thoroughly after handling.

Conditions for Safe Storage, Including Any Incompatibilities

Technical Measures: Comply with applicable regulations.

Storage Conditions (for quality reasons):

Incompatible Materials: Avoid contact with metal, as product will slowly corrode iron, brass, copper, aluminum and mild steel.

Special Rules on Packaging: Keep only in original container.

Store in corrosive resistant plastic or FRP container or container with corrosive resistant inner liner.

Specific End Use(s): Water treatment coagulant. For professional use only.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Control Parameters

Aluminum chloride hydroxide (12042-91-0)		
USA ACGIH	ACGIH TLV (mg/m ³)	TWA: 1 mg/m ³ (respirable fraction)

Exposure Controls

Appropriate Engineering Controls: Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Ensure all national/local regulations are observed.

Personal Protective Equipment: Protective goggles. Gloves.

Materials for Protective Clothing: N/A.

Hand Protection: Wear chemically resistant protective gloves.

Eye Protection: Protective goggles.

Skin and Body Protection: None usually needed.

Respiratory Protection: Use a NIOSH-approved respirator or self-contained breathing apparatus whenever exposure may exceed established Occupational Exposure Limits. Seek professional advice prior to respirator selection and use. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. **WARNING!** Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.

Other Information: When using, do not eat, drink or smoke. Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment
